

CSC-GEC PhD & PostDoc program

The GEC or Ecoles Centrale Group

Founded in 1990, the Ecoles Centrale Group consists of 5 engineering schools in France : CentraleSupélec (Paris), Centrale Lyon, Centrale Nantes, Centrale Lille, and Centrale Marseille, but also 3 schools abroad : Centrale Pekin (China), Mahindra Ecole Centrale (India) and Centrale Casablanca (Morocco). These 8 schools share the same values. Based on nearly two centuries of recognized Centrale education know-how in France, the Ecoles Centrale Group's goal is to promote and implement excellent engineering education with the following characteristics: multidisciplinary curriculum for engineers, with a broad scope of scientific, engineering and management fields taught to all students; close contact with the industry through joint projects and training periods; and academic education and applied research closely related to industry stakeholders.

The CSC-GEC program

The CSC-GEC program offers each year 40 PhD positions and 10 post-doctorate positions on innovative subjects divided between the GEC's 5 schools in France. Its added value is the Schools' strong links with companies working in a variety of domains. Our partnership enables us to provide our students with privileged study and research conditions. Between 2014 and 2018, 163 students have benefited from this program.

How to apply

Get to this website and follow the procedure:
